Good evening,

I'm reaching out to you regarding the DWSRF. I urge you to please consider Sweeny, TX for funding. We are desperately seeking any type of assistance with our ongoing water issue and it would truly make such a difference in thousands of lives. We love where we live, but cannot continue to subject my children and family to the constant water issues. These issues unfortunately arose decades ago and will require a complete overhaul of our entire system which is time and money we just don't have in this small but mighty town. I have included a recent news article I was interviewed for regarding this water issue in addition to some personal photos I have taken over the last 4 years since we have moved here. Please please please consider Sweeny. We need help now and this funding would change the trajectory of our town's future in a multitude of ways.

News Article: <https://houstononline.com/story/news/local/2024/07/23/sweeny-texas-water-issues-02654567>

This bottom photo was taken earlier this month. This is unfortunately a very common occurrence that usually lasts several days. Earlier this year we had over almost over a 2 month span of disgusting water. We could not bathe, drink or wash our clothes in it. I personally spent over \$1000 on laundromats just to keep our household running. Not to mention the gas and time it stole from us having to shower elsewhere and constant trips to the store for more bottled water. There currently does not seem to be an end or solid solution in site so I kindly ask you to please allow Sweeny to qualify for this funding. We need your help.

Thank you for your time and consideration,
